See more details on following pages...

ROI: Rapid Content Creation & Management

Creating and managing visual based content with Proceed.app is...

12x faster

than legacy methods and systems
(binders, SOPs, etc...)

Proceed.app customers report spending on average 8 hours less creating visual based content with Proceed.app than they did with their old ways of documenting processes and creating training materials.

4x faster

than other leading training
systems

Customers report spending on average 2.5 hours less creating visual based content with Proceed.app than they did with other training systems.

ROI: Rapid Content Creation & Management

How much time will Proceed.app save you?

Customers report on average taking 45 minutes to create a content item inside of Proceed.app. In this example we'll say there are a 250 documents or content items, however most companies will have more. Here's how Proceed.app stacks up to the alternatives:

ROI: Increased Accessibility of Training

Proceed.app helps factories increase the accessibility of their training and support content by digitizing content and making it visual-based. This results in:

Faster Onboarding

Reduced Downtime

ROI: Increased Accessibility of Training

Proceed.app has the power to significantly reduce the quantity of hours an experienced employee has to spend training new employees.

Faster Onboarding

Using Proceed.app at a 120 Person Company

Normal Buddy System Training: 40 hours

Hours saved with Proceed.app: 30 hours

Production Employee Count: 120 employees

Industry Turnover Rate: 30%

QTY of New Employees: 36 employees / year

$(30 \text{ hours}) \times (36 \text{ employees}) \times (\$50/\text{hour}) = \$54,000/\text{year saved}$

ROI: Increased Accessibility of Training

By making content more accessible, you'll have less unexpected downtime and an increase in OEE

Reduced downtime

Using Proceed.app at a company with 10 Production Lines

Production Lines: 10 Lines

Shift: 1 shift / 40 hours

Average downtime per line: 2 hours / week

Hours saved with Proceed.app per line: 0.5 hours / week

Total hours saved per year: 250 hours

(250 hours) x (\$300/hour) x (1 shift) = **\$75,000 increased output**

↑
Total hours saved
per year

↑
Production Line
output per hour
